

LOGONDIS

LogisticsUpgrade

Website:

Supply chain has become THE decisive competitive factor. Logondis helps you realize the potential in your supply chain. The interaction in a supply chain is becoming increasingly complex and often spans the entire globe. Logondis takes care of the monetary and procedural evaluation and planning of logistical supply concepts for you. The focus is on the areas of packaging, transport, storage and the legal requirements that must be adhered to.

The following is the UI/UX and interface design of the website for Logondis.

LogisticsUpgrade

The Supply Chain has become THE decisive competitive factor. We help you to realize the potentials in your Supply Chain.

TALK TO US

ENGLISH GERMAN

Johannes Schätzl

Before becoming self-employed and founding Logondis, Johannes worked for 10 years in logistics in the automotive industry, including 8 years at the BMW Group in various positions. As a result, and also through a stay abroad of several years in Mexico, he has the necessary experience for cross-industry and cross-border project assignments. In addition, there is also experience in professional management as head of planning and operational projects.

He holds a M.Sc and B.Sc degree in Business Administration and Logistics from the Universities of Würzburg and Regensburg. In addition to German, he is also fluent in English and Spanish. Johannes has advanced user knowledge in the SAP R/3 modules MM, SD and WM.

Matthias Erler

Before starting his own business, Matthias worked for 12 years in logistics and the supply chain, mainly in mechanical engineering. Of which 9 years at the LIEBHERR Group in various positions. Through various and multi-year stays abroad in South Africa, Brazil, the USA and Switzerland, he has the necessary experience for international and cross-industry project assignments. Added to this is the expertise in the technical management of planning and operational projects. Transparent reporting was always carried out to stakeholders and management.

He holds an MBE and Dipl. Betriebswirt (FH) degree in industrial engineering and business administration from the University of Stuttgart and the University of Würzburg. In addition to German, he is also fluent in English and Portuguese. Matthias can quickly familiarize himself with a new environment and software tools.

SUPPLY PLANNING _____ 1

CREATION OF LOGISTICAL SUPPLY CONCEPTS IN GLOBAL SUPPLY CHAINS

The stability of supply chains is currently the highest goal of supply chain management. We stand for stable AND sustainable supply concepts that consider all necessary aspects of the supply chain. With us you get a complete solution from planning to coordination to implementation.

Through our holistic planning, you achieve cost advantages in later operation.

EVALUATION AND PLANNING

The interaction in a supply chain is becoming increasingly complex and often spans the entire globe. We take over the monetary and procedural evaluation as well as planning of logistical supply concepts for you. The focus is on the areas of packaging, transport, warehousing and the legal requirements to be complied with.

We attach great importance to a functioning overall concept, because mastering the supply chain is a key success factor for your company.

PROJECT COORDINATION

The network of parties involved in the value creation process is becoming increasingly complex – in particular due to the globalization of sales markets, production sites and procurement markets. We support your team with the management and coordination of logistics projects. With our know-how in project management, we ensure an efficient and successful project completion. This allows your employees to concentrate on their core activities.

PRACTICAL IMPLEMENTATION

We don't see our responsibility ending with concept work.

An evaluated and planned concept must also be implemented in operational operations. We are also happy to take care of this for you and ensure a smooth implementation with our experience.

2 _____ COST REDUCTION IN OPERATIONS

TRANSPARENT PRESENTATION OF SAVINGS POTENTIAL BY MEETING THE LOGISTICAL REQUIREMENTS OF YOUR CUSTOMERS.

The logistical requirements in the automotive industry are becoming increasingly complex. Fulfillment is an enormous challenge for parts suppliers. This also increases the risk of costs due to special expenses. We show these costs transparently and help you to reduce them sustainably.

We are happy to support you in optimizing your supply chain processes, structures or networks and always have the optimum for the overall process in mind.

ANALYSIS AND PREPARATION

Above all, crises show that a functioning and robust supply chain is a prerequisite for successful and economical production.

We take over the analysis and preparation of the special expenses incurred by your customers. This enables you to derive targeted measures and optimize your processes.

We support your team in consistently meeting customer requirements in day-to-day business.

Eric Rosemann

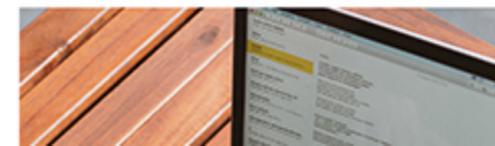

Consultant

As the youngest member of Logondis LogisticsUpgrade GmbH, Eric looks back on a comparatively short, albeit learning-intensive CV. His three-year dual bachelor's degree was characterized by learning and solving current, complex logistics issues at the university and working in the indirect taxes/customs division at Ernst & Young GmbH Wirtschaftsprüfungsgesellschaft. Before that, Eric gained his first experience at one of the car manufacturers based in Germany. Working in international foreign trade, Eric has extensive knowledge in the area of customs/import sales tax and excise duties. In his young career, he assisted in several client projects.

With his B.A. in the field of service management with a focus on logistics and supply chain management, he is still at the beginning of his career. As a former student abroad, Eric is fluent in German, English and Spanish at A2 level. Working with legal texts is one of his strengths.
